

Purpose

This short course offers instruction in the procedures of installation of adhesive anchor system which have been adopted by the American Concrete Institute and Concrete Reinforcing Institute.

The course is geared towards adhesive anchor installers employed by concrete suppliers, contractors, testing labs, government agencies, and other organizations in the concrete industry. This will also be of value to concrete construction special inspectors.

Those in attendance will be given the opportunity to take both written and performance exams that covers the vertical down and vertical up method. Those passing both the written and performance exams will receive a certificate and wallet card that recognizes them as "ACI-CRSI Adhesive Anchor Installer". Certification is valid for 5 years.

The American Concrete Institute's 2011 Building Code Requirements for Structural Concrete, which is referenced by the 2012 International Building Code, recognizes the role installation plays in proper performance of anchors and now requires certification of installers when installing adhesive anchors in specific orientations.

ACI_CRSI Adhesive Anchor Installation Certification Program

Industry Short Course

**January 10th & 11th, 2019
Pittsburg, Kansas**

ACI/CRSI Adhesive Anchor Installer Course Content

ACI-CRSI defines an adhesive anchor installer as a person who has demonstrated the ability to read, comprehend, and execute instructions to properly install adhesive anchors in concrete. The Adhesive Anchor Installer must also demonstrate possession of the knowledge to properly assess ambient conditions, concrete condition, materials, equipment and tools for installing adhesive anchors and determine when it is appropriate to proceed with installation of an adhesive anchor
