

CONCRETE INNOVATIONS

LEARNING CENTER | AWARD PROGRAM

Session 11: Innovative Pavement Systems

This session will focus on concrete pavement innovations that positively impact the cost, environment, opening time, and ease of construction. We will discuss the life cycle of pavements, their greenhouse gas emissions, and the potential for reducing these emissions by involving multiple stakeholders in the design, materials, and asset management of pavements. We will also use case studies to demonstrate how to lower the environmental impacts of concrete pavements.

[Register Now](#) for Concrete Innovations Learning Session 11

May 17, 11:00 am – 1:00 pm eastern

- **Innovations in Concrete Pavements**
Brian Killingsworth, Executive Vice President, NRMCA
 - **The Role of US Pavement Life Cycle in Decarbonization**
Hessam Azarijafari, Deputy Director, MIT Concrete Sustainability Hub
-

- **Opportunities to Optimize the Carbon Footprint of Concrete Pavements**
Lori Tiefenthaler, Senior Director, Marketing, Heidelberg Materials
